

The Spider Zone

An Interactive Climbing Structure with Giant Slide

The Mobile Spider Zone is a vertical interactive climbing structure that allows children to explore, crawl, climb and slide from 22 feet in absolute safety! This enclosed climbing structure allows participants to be creative, safe and secure. Climbers create their own climbing path as they ascend seven levels through the flexible weave. When they reach the top they crawl through the access tunnel and begin a brisk zoom down the 22 foot tall and 35 foot long accelerator slide! The Spider Zone is a huge hit because it combines the challenge of the climbing wall and thrill of the giant slide, two of today's most popular attractions. The continuous flow of participants allows for large volume and smooth operation at crowded venues.
